

Radleys Primary School

Physical Development:

Our Early Years setting boasts a large outdoor area which facilitate learning in all areas of learning. Children use large and small outdoor equipment and tools such as tyres and planks of wood, to develop balance, coordination and strength as the children make adventurous obstacle courses and games. Children have access to tools in the gardening area where they experience nature. This year we will be growing a variety of crops. Last year we successfully harvested peas, strawberries, potatoes and sprouts. However, our most successful harvest was our broad beans!

Indoors, children further develop their skills in the hall in a structured P.E. lesson. As well as the physical development opportunities, children learn to follow instructions, stay safe and keep healthy and fit. They also learn to be resilient and develop skills for cooperation as they play team games.

In class, children enjoy developing their fine motor skills using malleable materials and tools such as play dough, scissors and construction kits such as Lego.
